

Industrial Welding and Soldering Equipment

This welding and soldering equipment is designed for industrial applications. It features precise control, robust construction, and advanced technology for efficient and reliable operation.

Product Overview

Industrial-Grade Precision

This high-performance welding and soldering system is engineered specifically for demanding industrial applications. It features advanced digital intelligent technology, ensuring precise control and consistent weld quality across a wide range of operational tasks. Its robust construction provides the durability required for continuous heavy-duty use in professional environments.

Technical Specifications

Design Focus

D&D • High-Performance

Model Series

NBC-350

Key Features

Digital Intelligent, Full Function, Industrial Grade, High Precision
