

Industrial Welding Machine

This industrial-grade welding machine is designed for robust metallic processing applications. It features adjustable controls for precise welding parameters and includes a durable housing with an integrated cooling system.

Product Overview

Industrial-Grade Welding Performance

This industrial welding machine is engineered for robust metallic processing applications in demanding environments. It features precise, adjustable controls for voltage and amperage to ensure high-quality welds. Built for durability and mobility, the unit includes an integrated cooling system and a heavy-duty housing mounted on wheels for easy transport across the workshop floor.

Technical Specifications

Model Series	NB-300F / NB-21
Mobility	Wheeled Chassis, Portable
Cooling System	Yes

Key Features

Performance Controls

300 A

Max Amperage Capacity

Accessory Compatibility

- Standard welding torches
- Ground clamps
- Gas regulators
- Wire feed accessories
