

# Industrial Welding Machine

This industrial welding machine is designed for heavy-duty applications. It features adjustable settings for various welding processes and a durable construction for demanding environments.

## Product Overview

### Industrial Welding Capability

This high-performance industrial welding machine is engineered specifically for heavy-duty applications. It features a robust design to withstand demanding environments while providing consistent, reliable welding output. With integrated cooling systems and intuitive controls, it ensures efficient operation and extended service life for professional welding tasks.

## Technical Specifications

### Performance Capacity

**400 A**

Rated Output

Model ID

ZX7-400

## Key Features

### Primary Capabilities

- Heavy-duty industrial construction
- Adjustable welding process settings
- Integrated active cooling system
- Advanced safety feature suite
- User-friendly control interface

Application Environment

Heavy-duty, Industrial, Extended operation
