

Industrial Welding Machine

This industrial welding machine features adjustable power settings for diverse welding tasks. Its robust design includes mobility wheels and a user-friendly interface.

Overview

Industrial Welding Machine BXI-300-2

The BXI-300-2 industrial welding machine is engineered for heavy-duty performance and versatile welding tasks. Featuring a robust design, it is built to withstand demanding work environments while providing precise control through adjustable power settings. The unit is equipped with mobility wheels, ensuring easy transportation and flexibility across your shop floor.

Technical Specifications

Rated Output Current

300 A

Max Current

Adjustable Current Range

- 100
- 150
- 200
- 250
- 300

Key Features

Compliance

CE • Industrial Grade

Design & Utility

Adjustable power settings, Robust metal casing, Mobility wheels, Manual lever adjustment
