

Industrial Welding Machine

This heavy-duty welding machine is designed for industrial applications. It features adjustable settings for various welding processes and robust construction for durability.

Product Overview

Industrial-Grade Welding Precision

This heavy-duty welding machine is engineered for demanding industrial environments, providing the reliability required for professional welding tasks. Its robust construction ensures long-term durability under continuous use, while the integrated wheel system offers essential portability across worksites. With highly adjustable settings, it supports various welding processes to ensure precision and power for every operation.

Technical Specifications

Model Identification	ZXE1-500
Application	Industrial, Professional

Design Features

Build Quality Heavy-duty • Robust Construction	
Portability	Yes
