

# Industrial Welding Machine with Adjustable Amperage

This industrial welding machine is designed for robust performance in demanding environments. It features adjustable settings for various welding tasks, with amperage control ranging from 80A to 400A.

## Product Overview

### Industrial-Grade Welding Performance

The BXI-400-2 is a robust welding machine specifically engineered for demanding industrial applications. Featuring a durable frame and integrated portability wheels, it is designed for heavy-duty operations in both manufacturing and construction environments. With highly adjustable amperage settings, this unit provides the versatility needed for a wide range of professional welding tasks.

## Technical Specifications

### Adjustable Amperage

**80 A**

Minimum Amperage

**400 A**

Maximum Amperage

### Supported Current Settings

- 80
- 100
- 150
- 200
- 250
- 300
- 350
- 400

## Physical Attributes

### Application Suitability

Manufacturing • Construction • Heavy-duty

### Portability Features

Integrated wheels, Durable frame, Industrial design
