

Industrial Welding Machine with Adjustable Current

This heavy-duty welding machine is designed for industrial applications. It features adjustable current settings, robust construction, and portability with integrated wheels.

Product Overview

Industrial Performance

This heavy-duty welding machine is engineered for demanding industrial environments. It features highly adjustable current settings to provide versatility across various welding processes and materials. Designed with a robust, portable frame, the unit includes integrated wheels for easy maneuverability across job sites.

Technical Specifications

Current Control	Yes
Mobility	Integrated Wheels, Heavy-duty Construction, Portable Design

Application

Use Case

Industrial • Heavy-duty • Multi-material
