

# Industrial Wheat Flour Milling Machine

This wheat flour milling machine is engineered for processing wheat into high-quality flour. The robust system efficiently separates bran and endosperm while ensuring consistent results through automated operation.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Flour Milling Solutions

This professional-grade industrial milling machine is designed for high-volume processing of wheat and maize. The system incorporates a comprehensive multi-stage setup, including cleaning, grinding, and sifting components to ensure superior flour quality. Engineered for continuous operation, it serves as an ideal turnkey solution for commercial flour production facilities.

## Key Features

### Equipment Components

- Roller mills
- Cleaning equipment
- Sifting systems
- Conveying mechanisms
- Filtration units
- Automated packing machines

### Primary Applications

Wheat Flour, Maize/Corn Flour, Nshima Production, Injera Flour, Ugali Production

## Service & Support

### Warranty Coverage

1-Year Quality Guarantee • 1-Year Free Spare Parts

### Support Services

- Turnkey project design
- On-site installation
- System commissioning
- Operator training
- Lifelong technical service
