Product Overview

Industrial Milling Solution

This professional-grade industrial grinding mill is engineered for large-scale wheat and maize flour production. The complete turnkey system integrates advanced grinding units, precision sifting technology, and efficient pneumatic conveying to ensure consistent particle size and high-quality flour output. Designed for durability and continuous commercial operation, it includes comprehensive support for installation, commissioning, and operator training.

Technical Specifications

Production Capabilities

- Nshima flour production
- Injera flour milling
- Ugali flour production
- General wheat/maize milling

Compatible Grains

Wheat, Maize, Corn

Service & Warranty

Quality Assurance

1-Year Quality Guarantee • 1-Year Free Spare Parts

Service Commitment

Lifelong service support provided for all equipment.
