Product Overview

Industrial-Grade Wire Brush Solutions

This industrial wire cup brush set is specifically engineered for rigorous surface preparation tasks, including rust removal, paint stripping, and cleaning prior to soldering or welding. Designed for compatibility with power drills and angle grinders, the set provides versatile options for working on diverse materials such as metal, sheet steel, wood, and stone. With high-quality wire construction, these brushes ensure long-lasting performance and efficient material removal in professional automotive, construction, and metalworking environments.

Technical Specifications

Maximum Operating Speed

6000 RPM

Maximum RPM

Compatible Materials

- Metal
- Sheet Steel
- Wood
- Stone

Included Brush Configurations

- Crimped wire cup brushes
- Knot wire end brushes
- Wheel brushes

Tool Compatibility

Power Drills • Angle Grinders

Common Applications

Rust Removal, Weld Cleaning, Surface Preparation, Paint Stripping, Soldering Preparation
