

# Industrial Wire Wheel Brush Set

This industrial wire brush set is designed for surface preparation, rust removal, and cleaning. The set includes cup brushes, wheel brushes, and end brushes with steel and brass bristles, suitable for use with angle grinders and drills.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Industrial Surface Preparation

This industrial wire wheel brush set is engineered for rigorous surface treatment tasks, including rust removal, cleaning, and deburring. The set features a diverse collection of cup, wheel, and end brushes, making it highly compatible with standard power drills and angle grinders. These tools are essential for preparing metal, wood, stone, and sheet steel surfaces for critical welding or soldering operations.

## Technical Specifications

### Maximum Operating Speed

**6000 RPM**

Maximum RPM

### Compatible Materials

Metal, Sheet Steel, Wood, Stone

### Bristle Material

Steel Wire, Brass

## Usage Information

### Compatible Tools

- Power Drills
- Angle Grinders

### Primary Applications

- De-rusting
- Surface Cleaning
- Deburring
- Welding Preparation
- Soldering Preparation
