

Industrial Wood Lathe for Precision Woodworking

This heavy-duty woodworking lathe is designed for industrial applications. The robust machine features manual adjustments, an integrated motor, and an electrical control panel.

Product Overview

Industrial Precision Lathe

This heavy-duty industrial wood lathe is engineered for high-precision woodworking applications. Built with a robust, rigid frame and a long cylindrical work area, it ensures exceptional stability and accuracy during operation. The machine is fully equipped with an integrated motor, manual adjustment handwheels, and a centralized electrical control panel to facilitate professional-grade woodworking tasks.

Technical Specifications

Control Interfaces

- Large manual adjustment handwheel
- Integrated electrical control panel

Build Quality

Heavy-duty, Rigid Frame, Industrial Grade

Key Features

Operating Characteristics

1 Cylindrical

Work Area Orientation
