

Industrial Wood Planer for Surface Smoothing

This heavy-duty woodworking planer is designed for precise and efficient surface planing of wood. It features a robust frame, adjustable cutting height, and a powerful motor for smooth operation.

Product Overview

Industrial Surface Smoothing Powerhouse

This heavy-duty woodworking planer is engineered for precision surface smoothing and high-efficiency material removal. Built with a robust frame and a powerful motor, it provides the stability required for demanding industrial applications. The adjustable cutting height ensures consistent results across various project requirements, making it an essential tool for professional woodworking workshops.

Technical Details

Key Features

- Robust heavy-duty frame
- Adjustable cutting height
- Powerful industrial-grade motor

Model Number	MB106C
Planer Type	Single-sided woodworking planer
Best For	Surface Smoothing, Industrial Woodworking, High-Volume Planing
