

Industrial Wood Planer Thicknesser

This woodworking machine performs both planing and thicknessing tasks. It is designed with a robust metal construction and precision cutting head.

Overview

Industrial Wood Planer Thicknesser

This heavy-duty woodworking machine is designed for precision planing and thicknessing operations in professional shop environments. Featuring a robust metal construction, it provides the stability required for demanding industrial tasks. The unit includes adjustable infeed and outfeed tables and a high-performance cutting head to ensure smooth material processing.

Performance Metrics

Operational Capabilities

- Planing operations
- Thicknessing operations
- Adjustable infeed table
- Adjustable outfeed table

Key Features

Heavy-duty construction, Dual-function planing, Precision cutting, Professional grade

Technical Specifications

Build Quality

Robust Metal Frame

Model Identifier

ML424
