

Industrial Woodworking Machine

This woodworking machine is designed for professional use in industrial settings. It features a robust construction, a large working surface, and a control panel for precise adjustments.

Product Overview

Industrial Precision Woodworking

This heavy-duty woodworking machine is engineered for professional industrial environments. It features a robust, durable construction designed for long-term stability and precise performance. The unit integrates a spacious work surface, intuitive control panels, and essential dust collection capabilities to ensure efficient operation.

Technical Specifications

Blade Kerf	2.4 mm
Build Features	Heavy-duty, Industrial Grade, Precision Adjustment, Integrated Dust Collection

Safety and Control

Control System

- Multiple operation switches
- Status indicator lights
- Integrated safety mechanisms
