

Inflatable Marine Liferaft

This inflatable liferaft is designed for maritime emergency use. It features multiple inflatable chambers, a boarding ramp, and a canopy for protection.

Product Overview

Professional Marine Safety Solutions

These marine inflatable liferafts are engineered for critical emergency response in maritime environments. Designed with durability and reliability in mind, the range includes options for throw-overboard, davit-launchable, and reversible configurations. Each unit is constructed from weather-resistant materials to ensure performance during deployment in harsh sea conditions.

Product Types

Available Liferaft Configurations

- Throw over-board inflatable liferaft
- Throw over-board self-righting inflatable liferaft
- Davit launchable inflatable liferaft
- Davit launchable self-righting inflatable liferaft
- Open reversible inflatable liferaft
- Canopied reversible inflatable liferaft
- Throw over-board inflatable buoyant apparatus

Marine Evacuation Systems

Evacuation System Components

- Vertical escape chute
- Inclined single slide

Design Features

Key Features

Inflatable canopy, Multiple buoyancy chambers, Automatic inflation system, Boarding ramp, Weather-resistant construction

Application

Suitable Applications

Commercial Ships • Yachts • Maritime Vessels
