

Inflatable Rubber Boat for Rescue and Recreation

Inflatable boats are suitable for overwater tasks such as flood-fighting, emergency rescue, patrol, and drills. They can also be used in recreational activities.

Product Overview

Professional-Grade Inflatable Boat

This inflatable rubber boat is engineered for both rescue operations and recreational activities. Constructed using advanced high-frequency welding and cold adhesion techniques with durable 0.9T1000D/PVC materials, it offers exceptional resistance to abrasion and environmental factors. Designed with safety and longevity in mind, it features imported air valves and UV-resistant components for reliable performance in demanding conditions.

Construction & Materials

Manufacturing Techniques

- High-frequency welding
- Cold adhesion

Material	0.9T1000D/PVC
Material Characteristics	High abrasion resistance, High air tightness, UV resistant, Hydrolysis resistant, High temperature resistant

Standard Configuration

Included Equipment

- Dismantling aluminum alloy bottom board
- Aluminum alloy seating board
- Air pump

Compliance & Quality

Certifications

CCS • CE
