

Infrared Automatic Hand Dryer

This high-speed electric hand dryer uses infrared induction for touch-free operation. It is designed for efficient and hygienic hand drying in commercial and residential settings.

Overview

High-Performance Hand Drying

This high-speed electric hand dryer utilizes advanced infrared induction technology to provide a completely touch-free, hygienic drying experience. Designed for both commercial and residential environments, it features a robust, durable casing paired with a powerful motor for rapid drying cycles. Ideally suited for high-traffic restrooms and kitchens, this unit ensures efficient sanitation and convenience.

Key Performance Metrics

Performance Highlights

10 s

Drying Time

90 m/s

Air Speed

Technical Specifications

Operation	Infrared Induction (Touch-free)
Mounting	Wall-mounted
Suitable Environments	Commercial, Residential, Restrooms, Kitchens
