

# Infrared Radiant Space Heater with Timer

This radiant heater uses carbon fiber heating elements and has a 410mm diameter pan. It offers horizontal oscillation, a flexible heating angle, a 60-minute timer, and tip-over protection.

## Overview

### Efficient Infrared Heating Solution

This infrared radiant space heater is designed to provide immediate, targeted warmth for professional and commercial environments. Featuring a robust circular heating element protected by a durable grill, it ensures safe and effective heat distribution. The unit includes a variable control knob for precise temperature management and a built-in timer for energy-efficient operation, making it a reliable choice for maintaining comfortable temperatures in various indoor settings.

## Technical Specifications

Heating Technology	Infrared Radiant
Control Method	Manual control knob
Timer Included	Yes

## Design & Build

Color Scheme	Red • White
Design Features	Circular heating element, Protective safety grill, Stable base
