

# Infrared Space Heater

This infrared space heater is designed for indoor use. It features three heating elements protected by a metal safety grill and a handle for portability.

## Product Overview

### Efficient Infrared Heating Solution

This infrared room heater is engineered for targeted indoor warmth, offering an efficient way to heat specific areas. Designed with portability in mind, the unit features a convenient handle and a lightweight, durable white plastic body. Its three heating elements are secured behind a metal safety grill to ensure safe and reliable operation in professional or residential environments.
