

Infrared Space Heater

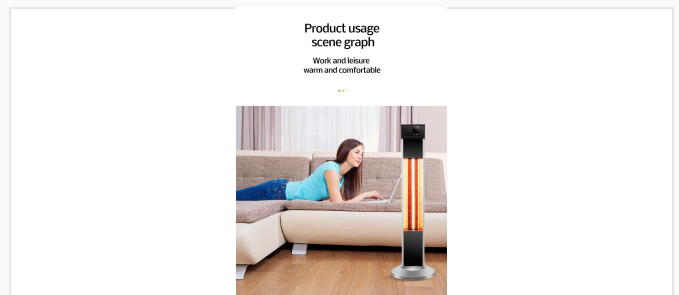

This infrared space heater provides efficient and targeted warmth. It features adjustable settings for customized heating levels and a user-friendly control panel.

Overview

Vertical design maximizes space utilization while offering a modern aesthetic.

Designed for personal comfort, seamlessly integrating into home or office decor.

Efficient Infrared Heating

This portable vertical infrared heater utilizes advanced carbon fiber heating elements to provide rapid, directional warmth. Designed for modern indoor environments, it features a sleek vertical aesthetic that maximizes space efficiency. With adjustable power settings, a 24-hour timer, and IP65-rated waterproof protection, it offers a reliable and customizable heating solution for both work and leisure spaces.

Technical Specifications

Power Configurations

Model	Power (W)	Net Weight (kg)	Gross Weight (kg)
PD15R	1500	3.9	5
PD20R	2000	4.35	5.5

Dimensions

300 mm
Base Width

805 mm
Height (PD15R)

900 mm
Height (PD20R)

Features

Product Details

Ingenious details give you a better experience

Anodized extruded aluminum alloy housing ensures durability and efficient heat distribution.

Power Settings

- 500/1000/1500W (for PD15R)
- 750/1500/2000W (for PD20R)

Key Features

IP65 Waterproof, Carbon Fiber Heating, Remote Control, 24-Hour Timer, Overheat Protection

Construction

Stainless steel base board provides stability, paired with a user-friendly control interface.

Build Materials

- Anodized extruded aluminum alloy housing
- Stainless steel base board

Electrical Specifications

1.7m power cord with European plug, 3G x 1.0mm2 cable specification
