

Infrared Space Heater for Indoor Use

This infrared space heater provides efficient and targeted heating for indoor spaces. It utilizes infrared technology, directly warming objects and people rather than heating the air, resulting in faster and more energy-efficient heating.

Product Overview

Efficient Indoor Heating Solution

The Infrared Space Heater provides efficient and targeted heating for indoor spaces. Utilizing advanced infrared technology, it directly warms objects and people rather than heating the air, resulting in faster and more energy-efficient performance. Designed with a durable metal housing and a stable base, this heater is an ideal choice for supplemental heating in homes, offices, and other indoor environments.

Design & Construction

Housing Material	Durable Metal
Form Factor	Cylindrical
Safety Features	Protective Grille, Stable Base

Operation & Control

Control Location	Top-mounted
Power Source	Standard Household Electrical

Application

Intended Use

Indoor Use • Supplemental Heating

Suitable Environments

- Homes
- Offices
- General Indoor Spaces
