

# Infrared Space Heater with Digital Controls

This space heating apparatus is designed for household use. The device provides efficient and localized heating for indoor environments.

## Product Overview

### Efficient Infrared Space Heating

This versatile infrared space heater delivers efficient, localized warmth for indoor environments up to 16 square meters. With a sleek white and black finish, it features three adjustable heating power levels and a convenient digital timer for customized comfort. Designed for safety and flexibility, this unit is suitable for use in bathrooms and provides reliable performance for various indoor settings.

## Performance

### Performance Metrics

**1500 W**

Maximum Power

**16 m<sup>2</sup>**

Heating Area

**24 H**

Timer Range

### Heating Levels

- 500
- 1000
- 1500

## Technical Specifications

### Electrical Requirements

Parameter	Value
Rated Voltage	220V
Frequency	50Hz
Heating Method	Infrared reflection

Dimensions	660 x 210 x 560 mm
------------	--------------------

## Features

### Usage Suitability

Bathroom-Safe • Residential Use

Applications	Bathroom Suitable, Vertical Orientation, Digital Controls
