

# Infrared Space Heater with Safety Cage

This infrared space heater is designed for indoor use. It features two heating elements enclosed in a metal safety cage for safety.

## Product Overview

### Efficient Localized Heating

This infrared space heater is designed for effective indoor climate control, utilizing two heating elements to provide direct, radiant warmth. Enclosed within a durable metal safety cage, it prioritizes user safety while maintaining a compact footprint. Its robust construction, featuring a red frame and stable black base, makes it a reliable solution for localized heating needs in various indoor environments.

## Technical Specifications

Heating Method	Infrared
Heating Elements	2

## Design & Construction

### Color Scheme

Red Frame • Black Base

Safety Features	Metal Safety Cage, Indoor Use Only
