

Infrared Space Heater

This infrared space heater is designed for indoor supplemental heating. It features multiple heating elements protected by a metal grille and includes safety features.

Product Overview

Efficient Infrared Heating Solution

This infrared space heater is designed for versatile indoor supplemental heating applications. Featuring a durable gray housing and high-efficiency heating elements, it provides rapid warmth through infrared technology. Engineered with integrated safety mechanisms to prevent overheating, it is a reliable choice for professional environments requiring focused temperature control.

Technical Specifications

Heating Technology	Infrared
Recommended Use	Indoor

Safety & Design

Safety Protections

- Overheat protection
- Protective metal grille

Operational Warning

High Surface Temperature Warning

Control Method	Side-mounted manual knob
