

Infrared TV Remote Control

This is an infrared remote control for televisions. It allows users to control power, volume, channels and navigate menus.

Product Overview

Professional Replacement Controller

This infrared television remote control is precision-engineered for compatibility with JXMGE television systems. It provides a standard, intuitive layout that allows for seamless navigation of all primary TV functions including volume, channel selection, and menu controls. Built for reliability, this unit is an ideal replacement or spare controller for professional or residential environments.
