

Injection Mold for Electronic Component Manufacturing

This injection mold is specifically designed for manufacturing electronic parts. It features advanced cooling channels and durable steel construction to ensure high accuracy and minimal defects.

Product Overview

Precision Injection Molding Solution

This high-precision injection mold is engineered specifically for the manufacturing of electronic components. Designed for durability and longevity, it incorporates advanced cooling channels to maintain consistent temperatures and ensure high part accuracy. It is optimized for high-volume production, making it an ideal solution for small to medium-sized electronic parts with minimal defect rates.

Technical Capabilities

Design Features

- Multi-cavity design for efficiency
- Advanced internal cooling channels
- High-quality steel construction
- Precision-engineered for high-volume production

Suitable Applications

Automobile Parts, Semiconductors, IC Connectors, Lead Frames, Electrical Connections, Motor Fixed Rotors

Quality & Standards

Management Standards

ERP System Integrated • Standardized Process Management • Continuous R&D Innovation
