

Injection Mold for Storage and Tool Boxes

These injection molds are used to produce plastic storage boxes and tool boxes. They are designed for creating containers with lids, stackable bins, and general-purpose storage solutions.

Overview

High-Precision Storage Solution Molds

This collection of professional-grade injection molds is specifically engineered for the high-volume production of durable storage boxes and tool organizers. Designed for versatility, the range supports various configurations including stackable bins, containers with secure lids, and heavy-duty tool cases. These molds are optimized for standard plastic injection molding processes, ensuring consistent output and structural integrity for your manufacturing needs.

Product Range

Available Mold Configurations

- Storage Box Mould_346
- Storage Box Mould_345
- Storage Box Mould_344
- Tool Box Mould_367
- Tool Box Mould_366
- Tool Box Mould_162

Primary Applications

Storage Containers, Tool Boxes, Stackable Bins, Lidded Containers
