

Injection Molding Machine for Plastic Parts

This injection molding machine is designed for precision and efficiency in plastic part manufacturing. It features a robust clamping unit, advanced hydraulic system, and user-friendly control interface for optimized production.

Overview

High-Performance Injection Molding

This injection molding machine is engineered for precision and efficiency in high-volume plastic part manufacturing. It features a robust clamping unit and an advanced hydraulic system, ensuring consistent quality and high throughput across diverse applications. The integrated user-friendly control interface allows for optimized production settings, making it a reliable solution for professional manufacturing environments.

Machine Details

Key Features

- Robust clamping unit
- Advanced hydraulic system
- User-friendly control interface

Model Identifiers

BL 120 HS, C 430

Performance Metrics

Performance Highlights

120 Tons

Clamping Force

430 cm³

Injection Capacity
