

Inline Cord Switch

This inline cord switch is designed to control the flow of electricity in a circuit. It features a transparent casing, allowing visual inspection of the internal components.

Product Overview

Professional Inline Cord Control

This inline cord switch is designed for reliable electricity flow control in low-power electrical circuits. Featuring a transparent, clear casing, it allows for easy visual inspection of internal components to ensure safety and integrity during operation. It is an ideal solution for customizing or repairing electrical cords for various professional and home appliances.

Technical Specifications

Housing Construction	Transparent clear housing
Connection Interface	Standard two-prong plug
Device Suitability	Low-power devices, Electrical appliances, Circuit control

Key Features

Visual Inspection	Yes
