

Inline Fuse Holder with Red Wire Loop

This inline fuse holder features a red wire loop. The fuse holder is black and cylindrical, with a hex-shaped section in the middle.

Product Overview

Reliable Circuit Protection

This inline fuse holder provides a secure and durable housing for automotive or electronic fuses. Designed with a convenient red wire loop, it allows for easy integration into existing wiring harnesses. Its robust, cylindrical construction ensures reliable performance in various electrical applications.

Technical Details

Design Type	Inline
Wire Configuration	Red wire loop
Housing Shape	Cylindrical with central hex section
Housing Color	Black

Features

Key Features	Inline Design, Pre-wired, Durable Housing, Easy Installation
