

Installation Mallet with Fiberglass Handle and Interchangeable Soft Faces

This installation mallet has a fiberglass handle with a rubber grip. It features a durable metal core with interchangeable soft faces designed to prevent damage to surfaces during installation.

Product Overview

Professional Installation Mallet

This installation mallet is engineered for precision and surface protection, featuring a durable metal core head equipped with interchangeable soft faces. The fiberglass handle is paired with a non-slip rubber grip, ensuring comfortable and secure handling during extended use. It is an ideal tool for applications where controlled, non-marring force is required, such as furniture assembly, flooring installation, and delicate material handling.
