

Insulated Closed End Wire Connector

These insulated closed end wire connectors ensure secure and reliable electrical connections. They provide a protective covering for wire terminations, preventing accidental shorts and environmental contamination.

Product Overview

Reliable Electrical Termination

These insulated closed-end wire connectors are designed to provide secure and reliable electrical terminations. They effectively cover wire ends to prevent accidental short circuits and protect against environmental contamination. Built from durable, flame-retardant materials, these connectors are engineered for long-lasting safety and performance in demanding electrical environments.

Technical Specifications

Common Applications

- Control panels
- Appliances
- Automotive wiring

Visible Markings

HY4G • E5.RU

Material Characteristics

Insulated, Flame-retardant, Durable
