Product Overview

Professional Insulated Combination Pliers

These high-quality combination pliers are engineered for safety and performance in demanding electrical environments. Featuring high-voltage insulation composite handles and a durable construction, they provide reliable gripping, cutting, and bending capabilities. Designed for versatility, these tools are essential for professionals working in industries such as petroleum, chemical, mining, and power generation.

Technical Specifications

Material	PV-C
Size Range	6-8 inches
Handle Construction	High voltage insulation composite materials
Surface Treatment	Injection molding to prevent electrostatic
Manufacturing Technique	Hot Forged, Casting

Usage & Compliance

Certifications

ISO9001 • UKAS

Suitable Industries

- Petroleum
- Chemical Industry
- Power Generation
- Railway
- Mining

Logistics

Order Processing	Within 5 days
Packaging Options	Carton or customized according to customer requirement
