

# Insulated Deep Groove Ball Bearing

This is a high-performance 6316m.c3.J20C insulated bearing. It features robust construction and electrical insulation to prevent damage from stray currents.

## Product Overview

### High-Performance Insulated Bearing

This deep groove ball bearing is engineered with specialized insulation on either the inner or outer ring to effectively prevent damage caused by stray electrical currents. Designed for demanding industrial environments, it provides reliable operation in electric motors and generators. Its robust construction ensures longevity and consistent performance under various operating conditions.

## Technical Specifications

Bearing Type	Deep groove ball bearing
Insulation Type	Inner ring or outer ring

## Dimensions

### Key Dimensions

<b>80 mm</b> Inner Diameter (d)	<b>170 mm</b> Outer Diameter (D)	<b>39 mm</b> Width (B)
------------------------------------	-------------------------------------	---------------------------

## Logistics

### Packaging

- Carton boxes
- Wooden Cases
- Pallets

Current Stock	18 pcs
Service Terms	Neutral, OEM
