

Insulated Grip Pliers

These pliers are designed for gripping, cutting, and bending wires. They feature insulated handles for electrical safety and precision-machined jaws for enhanced performance.

Product Overview

Professional Insulated Grip Pliers

These general-purpose pliers are engineered for safety and efficiency in electrical applications. Featuring high-quality insulated handles, they provide essential protection while maintaining an ergonomic grip for extended use. The durable steel construction and precision-machined jaws ensure reliable performance for wire cutting, bending, and gripping tasks.

Physical Characteristics

Construction Material	Durable Steel
Handle Design	Ergonomic Insulated

Capabilities

Key Functions	Wire Cutting, Bending, Gripping
---------------	---------------------------------

Safety & Compliance

Insulated Handle	Yes
