Overview

Professional Insulated Hex Wrench Set

This set of insulated hex key wrenches is designed for safety and precision in high-voltage environments, rated for use up to 1000V. Crafted from high-carbon steel and drop-forged for durability, these tools feature a hardened finish for long-lasting performance. They are an essential solution for maintenance tasks in oil, gas, and petrochemical industries.

Technical Specifications

Material	High carbon steel
Hardness	58 HRC
Voltage Rating	1000 V
Size Range	3-17mm
Surface Finishes	Black, Fine Polished, Nickel Plated

Design & Construction

Manufacturing Process

- Drop forged
- Oil hardened

Handle Type

Heavy duty double color or single color grip

Applications

Recommended Industries

Oil & Gas • Petro-chemical
