

Insulated Linesman Pliers

These linesman pliers are designed with insulated handles for electrical work. They are used to clamp or bend metal sheets, cut leads, and strip wires.

Product Overview

VDE-certified insulated linesman pliers featuring ergonomic handle design and hardened cutting edges for precision electrical work.

Professional Insulated Linesman Pliers

These VDE-certified insulated linesman pliers are engineered for safety and performance in electrical environments. Designed with a soft-grip ergonomic handle and durable drop-forged steel construction, they provide reliable gripping, bending, and cutting capabilities. The tool is corrosion-resistant and specifically built to prevent electric shock, making it an essential instrument for professional electricians.

Technical Specifications

Plier Type	Linemans Pliers
Material	Insulated Steel
Standards	IEC60900, VDE

Features & Capabilities

Key Features

- Insulated handle for shock prevention
- Corrosion resistant
- Side cutter included
- Wire stripper included
- Drop forged steel construction

Handle Design

Yellow/Red • Soft Grip • Ergonomic

Operational Details

Operational Capabilities

Function	Status
Insulated	Yes
Side Cutter	Yes
Wire Stripper	Yes
Wire Crimper	No
Non-sparking	No

Tethering

Standard Tool (Accessory Needed for Tethering)
