

Insulated Loudspeaker Cable

This cable is used as wiring for small electrical instruments, meters and broadcasting lighting. It is suitable for indoor appliances.

Product Overview

Professional Audio Connectivity

This insulated loudspeaker cable is engineered for reliable signal transmission in diverse audio environments. Featuring high-quality plain copper wire strands and durable PVC insulation, it ensures consistent performance for your speaker setups. The transparent jacket design provides clear polarity identification for easier installation in professional or home audio systems.

Technical Specifications

Rated Voltage

300 V

Rated Voltage

Conductor Material	Plain copper
Insulation Material	PVC
Max Conductor Temperature	70

Key Features

Product Highlights	Transparent Insulation, Polarity Identification, Plain Copper Conductors, High Durability
