

Insulated Ring Wire Crimp Connector Terminals 0-10 AWG

These insulated ring wire crimp connector terminals are designed for secure and reliable electrical connections. They accommodate wire gauges from 0 to 10 AWG, providing versatility for various automotive and electronic applications.

Product Overview

Professional Grade Connectivity

These insulated ring wire crimp terminals are engineered to maximize the performance and reliability of electrical systems. Designed for versatility, they accommodate wire gauges ranging from 0 to 10 AWG, making them suitable for a wide array of automotive and electronic applications. The integrated insulation provides critical protection against short circuits and environmental exposure, ensuring durable and professional-grade wire terminations for your projects.

Technical Specifications

Compatible Wire Gauge	0 - 10 AWG
Connector Type	Insulated Ring Terminal
Insulation Features	Short Circuit Protection, Environmental Protection

Application

Common Applications

- Automotive Electrical Systems
- Audio System Installations
- General Electronic Wiring
- Battery-to-Amplifier Connections
