

Insulated Screwdriver Set for Electrical Work

This set features two insulated screwdrivers designed for electrical applications, providing protection up to 1000V. It includes one Phillips head (PH1x80) and one slotted screwdriver (0-0.6x5x100) for versatile use.

Product Overview

Professional Insulated Screwdriver Set

This professional-grade insulated screwdriver set is engineered specifically for electrical work, ensuring safety in high-voltage environments up to 1000V. The set features ergonomic handles designed to provide superior grip and control, significantly reducing user fatigue during extended operation. Built for precision and durability, these tools are essential for reliable performance in demanding electrical applications.
