

Insulated Tool Set for Electrical Work

This 20-piece insulated tool set is designed for safe use on or near live electrical circuits up to 1000V AC or 1500V DC. The set includes sockets, extensions, and a ratchet, each tested to meet international safety standards.

Overview

Professional Insulated Tool Set

This 20-piece insulated tool set is precision-engineered for safe operation on or near live electrical circuits. Rated for up to 1000V AC or 1500V DC, each tool incorporates a robust dual-layer insulation system for enhanced operator protection. The complete kit is organized within a durable carrying case, making it an essential solution for electricians, technicians, and engineers working in hazardous electrical environments.

Technical Specifications

AC Voltage Rating

1000 V

Max AC Voltage

DC Voltage Rating

1500 V

Max DC Voltage

Total Pieces

20

Safety & Design

Insulation System

Dual-layer insulation

Safety Compliance

1000V AC Rated, 1500V DC Rated, Individually Tested
