

Insulation Piercing Connector Fork Wrench

This fork wrench is designed for holding JBC insulation piercing connectors while tightening bolts. It is constructed from stainless steel and weather-resistant materials.

Product Overview

Professional Insulation Piercing Connector Tool

The JCQ fork wrench is a specialized hand tool engineered for secure handling of insulation piercing connectors during bolt tightening. Constructed from durable stainless steel and weather-resistant materials, it ensures reliability in outdoor electrical environments. Its ergonomic design provides the necessary leverage and stability for precise installation tasks.

Technical Specifications

Material Composition

Stainless Steel, Weather Resistant

Compatibility & Models

Type	Application	Pack (pcs)
JCQ-1	JBC16-70/16-70	8x4
	JBC16-95/2.5-35	8x4
	JBC25-95/25-95	8x4
	JBC25-120/25-120	8x4
	JBC35-150/6-35	8x4
JCQ-2	JBC35-150/35-150	8x4
	JBC2.5-35/1-10	8x4
	JBC10-95/1.5-10	8x4
	JBC35-150/35-150-2	8x4

Compatibility chart for JCQ-1 and JCQ-2 wrench models with various connector series.
