

Integrated Bicycle Crankset with Spoked Chainring

This bicycle crankset features an integrated chainring design, combining the crank arm and chainring into a single unit. The chainring has a unique spoked design to reduce weight and improve aesthetics.

Product Overview

Integrated Crankset Design

This integrated bicycle crankset combines the crank arm and chainring into a single, cohesive unit, optimizing both structural integrity and aesthetic appeal. Featuring a unique spoked chainring design, it is engineered to reduce rotational weight while maintaining durability. This component is specifically designed for single-speed or internally geared bicycle systems, offering a streamlined solution for modern builds.

Technical Specifications

Finish

Dark Gray • Black

Design Features

- Integrated crank arm and chainring
- Spoked chainring pattern
- Central bolt attachment
- Standard pedal interface

Crankset Type

Integrated

Compatibility

Single-speed, Internally geared
