

# Integrated Circuits and Hardware Assortment

This assortment includes electronic components, hardware tools, bearings, and fasteners. It also features lighting products and electric toys.

## Product Overview

### Comprehensive Hardware and Electronics Assortment

This assortment provides a versatile collection of essential components suitable for manufacturing, assembly, and repair projects. It encompasses a wide range of items, from precision electronic integrated circuits to durable mechanical hardware and lighting solutions. Designed for professional applications, this selection supports diverse needs across electronics, machinery, and consumer goods production.

## Product Categories

Product Categories	Electronic Components, Hardware Tools, Bearings, Fasteners, Lighting Appliances, Electric Toys, Moulds, Fitness Equipment
--------------------	---

## Electronic Components

### Typical Applications

- Signal Processing
- Memory Storage
- Control Logic
- Equipment Repair
- Electronic Assembly

IC Packaging	Dual In-line Package (DIP)
