

Integrated LED T8 Tube Light

The integrated LED T8 tube light is a high-efficiency lighting solution suitable for various applications. It features a durable aluminum housing with a polycarbonate diffuser for optimal light distribution.

Product Overview

Integrated LED T8 Tube Light

This Integrated LED T8 Tube Light is a high-efficiency lighting solution designed for various commercial and industrial applications. Featuring a durable aluminum housing with a polycarbonate diffuser, it ensures optimal light distribution and long-term reliability. The integrated design simplifies installation by eliminating the need for separate ballasts, making it an ideal choice for offices, supermarkets, and workshops.

Performance Metrics

Lumen Efficiency

100 lm/w
Max Efficiency

Power Factor	0.9 PF
Color Rendering Index (CRI)	75

Electrical Specifications

Input Voltage	AC100-265V
---------------	------------

Features & Benefits

Key Features

- Energy saving design
- Soft and gentle light output
- Integrated design for easy installation
- Lightweight construction
- Eye protection technology

Applications

Recommended Applications	Office, Hall, Supermarket, Metro, Workshop
--------------------------	--
