

Intelligent Robot Vacuum Cleaner with LCD Screen

This intelligent robot vacuum cleaner efficiently vacuums dirt, debris, and pet hair from carpets and hard floors. It features low working noise, obstacle avoidance, and an LCD screen for monitoring its working status.

Product Overview

Intelligent Cleaning Technology

This intelligent robot vacuum cleaner provides a comprehensive solution for floor maintenance, effectively removing dirt, debris, and allergens from both carpets and hard floors. Designed with a compact 8.7cm profile, it easily navigates under furniture, while integrated UV technology ensures a sanitized environment. The system features advanced sensors for obstacle and stair avoidance, coupled with quiet operation at 55dB, making it an unobtrusive addition to any professional or commercial space.

Technical Specifications

Working Noise	55 dB
Unit Thickness	8.7 cm
Remote Control Range	10 m

Features

System Capabilities

Feature	Description
Full Go	Restarts cleaning automatically after full charge
Speed Control	Adjustable moving speed via remote
Space Isolator	Creates invisible wall for off-limit areas
Maintenance	Easy-to-clean modular design

Core Functionalities	Auto Charging, UV Bacteria Kill, Floor Mopping, Space Isolation, Stair Avoidance, LCD Display
