Overview

Intelligent Floor Maintenance Solution

This intelligent sweeping robot is designed for efficient, automated floor maintenance in modern environments. Its low-profile, square-shaped chassis allows for seamless navigation under furniture and into hard-to-reach areas. Equipped with advanced obstacle avoidance and fall-prevention sensors, it ensures comprehensive cleaning coverage across various floor types.

Technical Specifications

Cleaning Modes

- Automatic
- Spot Cleaning
- Edge Cleaning

Navigation Technology

Obstacle Avoidance • Fall Prevention • Advanced Sensors

Design & Build

Low-profile design, Square-shaped chassis, Durable construction
