System Overview

Comprehensive Home Security Solution

This intelligent wireless home security system provides a robust, all-in-one monitoring solution for residential safety. Utilizing WiFi connectivity, the system integrates various sensors and detectors to provide real-time alerts and comprehensive status updates through a dedicated smartphone application. Designed for ease of use, it allows for remote device management, emergency notifications, and constant monitoring of all connected safety components.

Connectivity & Control

Connectivity	WiFi
Control Interface	Smartphone App

System Components

Included Sensors & Detectors

- Gas Detector
- PIR Motion Detector
- Smoke Alarm
- Water Leakage Alarm
- CO Detector
- Doors & Windows Alarm
- SOS Emergency Button

Central Gateway	Yes
