

Interactive Children's Painting System

This interactive painting system is designed to stimulate creativity and imagination in children. It features a large display, a magic pen input device, and a variety of interactive painting tools for an immersive experience.

Product Overview

Immersive Interactive Painting Experience

This interactive painting system transforms creative play into an engaging digital experience, designed specifically for children aged 3 to 8. By allowing children to bring their paintings to life on a large screen, the system fosters creativity and artistic exploration. It features interactive gameplay where children and parents can work together to defend an underwater marine world from threats, making it an ideal attraction for indoor playgrounds, shopping malls, and children's centers.
